

## Decades of experience from around the world.

Technical Rescue International specialise in the provision of technical rescue training and bespoke training packages for operations in high risk environments internationally.

Drawing on our extensive experience with the **Emergency Services, Military, Private Sector and Charitable Organisations both nationally and internationally**, we work with clients to deliver practical risk based solutions tailored to their specific needs.

All team members and instructors are operationally experienced, suitably qualified and adhere to policies and procedures aligned to the most up to date legislation, best practice industry standards, HSE recommendations and government guidance.

## Technical rescue training solutions tailored to your organisation.

Our range of UKRO approved courses and other accredited courses provide you with a world class training experience delivered by experts in their field. We will help to mentor delegates from entry level awareness courses all the way through to instructor level.
