

TECHNICAL Day 1		BASIC (0 - 4)	EFFICIENT (5 -7)	THOROUGH (8 – 10)
TEAM BRIEF	Crew Understood and confirmed Brief	Team gather insufficient info from IC of possible casualty location and Technical information, Tasks not carried out/not prepared to standard	Full info gained from IC but equipment pre-determined or not set up in a timely manner.	Full info on casualty gained from IC. Equipment is pre-determined and set up in advance of requirement.
	Complied with brief	Crews self-deployed and rescue techniques were ineffective or unsafe	A rescue plan was completed but poorly acted on with individuals working outside of brief	An effective rescue plan is devised and communicated and acted on all crew worked with in brief
	Safety issues identified and mitigated	No DRA took place no safe systems of work introduced	DRA took place poorly acted on some safe systems of work introduced	Robust DRA took place all information passed and acted on all safe systems of work that were required introduced
	Casualty safety maintained	Casualty was ignored and no safety measures were introduced	Contact was made with casualty with limited safety equipment introduced	Full contact was made and maintained with casualty, casualty safety systems were introduced including appropriate ppe
TECHNICAL APPLICATION	Equipment attached and used correctly	Equipment used incorrectly and poorly secured	Equipment used correctly but poorly attached or secured	Correct use of equipment and attached correctly and secure
	Good team communications	Poorly poor communications independent working	Effective Teamwork but too much / too little communication slowed operations down	Very effective team with excellent team communications
	Correct application of technical skills	Technical ability poor in correct application poor skills demonstrated	Technical ability effective with limited skills demonstrated	Excellent application of technical ability proficient skills demonstrated
	Appropriate equipment chosen for task	Inability to select appropriate equipment for task	Correct equipment chosen but limited knowledge of equipment application or potential	Quickly identified equipment, had extensive knowledge of equipment and application possibilities.
	CASUALTY AWARENESS	Little or no concern given to casualties well being or emotional state during operations. Poor packaging of casualty.	Good level of consideration given to both physical and mental welfare of casualty. Packaging appropriate for movement plan.	Excellent consideration given to all aspects of casualty care at all times throughout packaging and removal plan.
	LOGICAL RESCUE PLAN	Rescue plan not considered in light of casualties injuries with route not achievable or only achievable with excessive manipulation of casualty.	Rescue plan takes account of injuries and the route is achievable with some minor manipulation or adjustment to route during removal.	Rescue plan successful with no manipulation of casualty and no adjustments to route required once withdraw commenced.
	PROTECTION GIVEN AS REQUIRED	Little or no protection for casualty during operations and removal from scenario	Some protection for casualty during operations or removal from scenario	Excellent casualty protection given throughout operations and movements.

TEAMWORK & EFFICIENCY	PRE-PLANNING AND TASK PREPERATION	Technical personnel unsure of role or assigned tasks, demonstrating limited task preparation.	Technical personnel demonstrated full understanding of objectives, which lead to some pre-planning and task	Technical personnel fully proficient about role/function which leads to full pre-planning and task preparation.
	WELL BALANCED TEAM WORK WITH SIMULTANEOUS ACTIVITY	Technical personnel work as individuals or demonstrate poor co-ordination and communication with limited simultaneous activity.	Technical personnel demonstrate good co-ordination and communication with some simultaneous activity.	Technical personnel demonstrate full co-ordination and excellent communication with simultaneous activity throughout scenario.
	GOOD PROGRESSION ACHIEVED	Little progression towards the objective achieved.	Time reasonably spent to accomplish tasks by tech personnel with completion of majority of objectives.	Efficient, controlled and safe progression of plan. Achieving all of objectives making best of available time.
	MAINTAINS APPROPRIATE PPE AT ALL TIMES	Personnel fail to demonstrate correct procedures in relation to tool safety and PPE.	Good equipment safety and appropriate PPE use demonstrated the majority of time with minimal lapses and issues.	Technical personnel provide an excellent demonstration of equipment use with PPE at all times.
PERSONAL SKILLS	Rescue techniques	Unable to read water hydrology, poor rescue techniques, poor swimming, poor throw bagging, poor tethered etc	Effective rescue techniques demonstrated missed exit point limited understanding of water hydrology	Excellent rescue techniques demonstrated good understanding of hydrology
	Paddle skills	Poor paddle skills demonstrated, improper grip not full paddle blade depth, out of time with other paddlers not listening to commands	Effective paddle skills demonstrated, adequate grip slow to react to commands odd ineffective strokes	Proficient paddler anticipated commands understood how future water would effect craft competent.
	Technical Skills	Poor Technical knowledge shown, limited ability in the use of ropes, slings and technical equipment. Poor knowledge of the water environment.	Effective Technical knowledge shown, adequate ability in the use of ropes, slings and technical equipment. Has a limited knowledge of the water environment.	Excellent Technical knowledge shown, Confident in the use of ropes, slings and technical equipment. Has a good knowledge of the water environment.
