

PRE-SCENARIO SAFETY CHECK LIST

Rope 2024

This is a final risk assessment which will be carried out by a competent **UKRO** member prior to the scenario. It takes the format of a check list, and the scenario should not commence till all areas are deemed satisfactory.

Scenario Description and Team competing	
--	--

Areas to check	Acceptable	
Confirmation that all leads, assessors and volunteers working in this area have read and are familiar with the relevant site-specific risk assessment		
Lead assessor aware of scenario timing and has stopwatch		
Weather has been checked, where appropriate, including wind speed, and it is safe to proceed		
Hazard area has been cordoned off and safe distance between spectators		
Assessors are competent and familiar with scenario and all possible hazards		
Hazard area identified whereby all individuals will be in harness and clipped into an anchor point		
Pre-use check conducted on all kit in use by assessors and casualties		
Everyone involved in scenario and working in zone is using the appropriate level of PPE		
All anchor points for scenario have been identified and checked		
Sufficient equipment and suitable anchor points are available for emergency intervention		
All casualties, where used, have been safely placed and have declared themselves comfortable and ready to commence		
All equipment used at height is appropriately secured to prevent it falling		
All ropes and associated load bearing equipment is configured/positioned to avoid damage or obstructions e.g. - sharp or rough edges which could cause abrading etc.		
Effective communication between the team, casualty and assessors established		
Where used, sufficient visual contact with the rescuer and casualty to allow assessment of the latter's condition		
Emergency plan available and ready for immediate implementation		
Instructions given to any photographers regarding distances/personal safety		
All assessors aware of procedures to contact emergency services		
Competent person	Signature	Time and date
